MHP3 antigen and its fragments are useful in manufacturing a vaccine for treating or preventing a disease or disorder in an animal, especially pig, caused by M. hyopneumoniae infection e.g. enzoctic mycoplasma pneumonia. The mhp3-encoded proteins may be used as immunogens to generate antibodies which immunospecifically bind such an immunogen. The antibodies generated against the antigen are useful in diagnostic immunoassays, passive immunotherapy and generation of anti-idiotypic antibodies. Mhp3 proteins may also be used in immunoassays, e.g. to detect or measure in a biological sample from a vaccinated or potentially infected test animal the presence of antibodies to the antigen, and thus to monitor the immune response and/or to diagnose infection of the animal

The mhp3 genes, proteins and apoprotein antigens of the invention are useful in the manufacture of a vaccine for treating/ preventing a disease or disorder caused by infection with M. hyopneumoniae in an animal, especially a pig. The present amino acid sequence represents a Mycoplasma hyopneumoniae mhp3 protein of the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Novel apoprotein antigens encoded by Mycoplasma hyopneumoniae for use vaccines to prevent and treat diseases caused by infection with Mycoplasma hyopneumoniae in animals, especially pigs.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         King

                                                                                                                                                  The invention comprises the amino acid and coding sequences of Mycoplasma hyopneumoniae mhp3 proteins, the invention also comprises novel apoprotein antigens encoded by the M. hyopneumoniae mhp3 gene. M. hyopneumoniae is a bacterial pathogen that causes enzoctic mycoplasmal pneumoniae in pigs. The mhp3 genes, proteins and apoprotein antigens of the invention are useful in the manufacture of a vaccine for treating/ preventing a disease or disorder caused by infection with M. hyopneumoniae in an animal, especially a pig. The present amino acid sequence represents a mutant version of the Mycoplasma hyopneumoniae mhp3 protein which was modified for expression in E. coli
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Novel apoprotein antigens encoded by Mycoplasma hyopneumoniae for use in vaccines to prevent and treat diseases caused by infection with Mycoplasma hyopneumoniae in animals, especially pigs.

The mhp3-encoded proteins may be used as immunogens to generate antibodies which immunospecifically bind such an immunogen. The antibodies generated against the antigen are useful in diagnostic immunoassays, passive immunotherapy and generation of anti-diotypic antibodies. Mhp3 proteins may also be used in immunoassays, e.g. to detect or measure in a biological sample from a vaccinated or potentially infected test animal the presence of antibodies to the antigen, and thus to monitor the immune response and/or to diagnose infection of the animal

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Regression associated antigens (RAA's) are identified in material from neoplastic cells by their immunological reactivity with regression associated antibodies from the serum of patients diagnosed as undergoing regression of a tumour. RAA's can be used for tumour immunotherapy and for producing and purifying antibodies which can be used for tumour diagnosis, localisation and therapy. The antibodies can also be used for the production of anti-idiotypic antibodies which can also be used in immunotherapy. (Updated on 25-MAR-2003 to correct PF field.)

M. hyopneumoniae is a bacterial pathogen that causes enzottic mycoplasmal pneumonia in pigs. The mhp3 genes, proteins and apoprotein antigens of the invention are useful in the manufacture of a vaccine for treating/ preventing a disease or disorder caused by infection with M. hyopneumoniae in an animal, especially a pig. The present amino acid sequence represents the Mycoplasma hyorhinis Ag234-5 protein which is shown in a figure of the invention
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Sequence 457 AA;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Novel apoprotein antigens encoded by Mycoplasma hyopneumoniae for use vaccines to prevent and treat diseases caused by infection with
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                AAO15867;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Example; Fig 1; 38pp; English.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Mycoplasma hyopneumoniae in animals, especially pigs.

                                                                                                                                                                                                                                                                                                                                                                                                                         The invention relates to cytotoxic T-lymhpocyte (CTL)-inducers containing the M161 antigen, its partial peptide or their salt. The activity of CTL-inducers of the invention may be described as cytostatic. The antigen or its peptide fragment are applicable in anticancer agents for the prevention or treatment of cancer. The antigen and its derivative have superior CTL-inductive effect, giving anticancer agents that have low toxicity. The current sequence represents the M161 antigen amino acid
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  M161 antigen, its peptide fragment or their salt with e.g. inductive effect, applicable in anticancer agents combined antigen for preventing or treating cancer.
                                                                                                                                                                                                                                                                                                                                                                                       Sequence

The polynuclectide is useful for augmenting proliferation of B and T lymphocytes. The present sequence is Mycoplasma fermentans IL-
                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Sequence 428

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               맒
                                                     The invention provides novel immunoregulatory factor designated IL-X which has been isolated Mycoplasma and polunucleotides encoding such polypeptides. The polynucleotide is useful for augmenting proliferation of B and T lymphocytes. The present sequence is Mycoplasma fermentans IL-X precursor protein.
                                                                                                                                                                                                                                                                          New isolated polynucleotide, useful for augmenting proliferation T lymphocytes.
                                                                                                                                                                                                                                                                                                                                                      WPI; 2003-401108/38.

Oligonucleotide probes for the cDNA were designed from putative N-terminal M161Ag peptide sequences isolated from P19 cells. M161Ag can be used in the development of a leukaemia treating agent

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              The invention provides novel immunoregulatory factor designated IL-X which has been isolated Mycoplasma and polunucleotides encoding such polypeptides. The polynucleotide is useful for augmenting proliferation of B and T lymphocytes. The present sequence is Mycoplasma fermentans II X mature protein.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         New isolated polynucleotide, useful for augmenting proliferation {\tt T} lymphocytes.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Webb

The polynucleotide is useful for augmenting proliferation of B and T lymphocytes. The present sequence is Mycoplasma fermentans IL-X mature protein.

Sequence 6004, Application US/09134000C

Patent No. 6617156

GENERAL INFORMATION:

APPLICANT: Lynn Doucette-Stamm et al

TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO

TITLE OF INVENTION: ENTEROCOCCUS FAECALIS FOR DIAGNOSTICS AND THERAPEUTICS

FILE REFERENCE: 032796-032

CURRENT APPLICATION NUMBER: US/09/134,000C

CURRENT FILING DATE: 1998-08-13

PRIOR APPLICATION NUMBER: US 60/055,778

PRIOR APPLICATION NUMBER: US 60/055,778

PRIOR APPLICATION NUMBER: US 60/055,778

PRIOR FILING DATE: 1997-08-15

SOFTWARE: Patentin version 3.1

SEQ ID NO 6004

LENGTH: 362
